

## Letter from Gardiner Greene Hubbard to Alexander Graham Bell, September 20, 1892, with transcript

L. 1892. G.G.H. to A.G.B. Sept. 20, West Washington, D.C. Twin Oaks.

I was interested in your work on gravitation, although you seemed to think I could not understand it, and did not therefore care to enlighten me, when you had Major Powell. I have been reading an article by Prof. of Cornell in the Sept. Forum which touches on the same matters, if you have not read it please do so for I think it will interest you.

Major Powell was surprised to find how far you had gone with your investigations, and hopes you will them. It seemed to me the most important work you have ever undertaken, and should be followed out.

My young friend, J.S.Stone wrote you a letter on some subject of interest to him, I wish you could find time to dictate an answer. It would do him so much good. The weather has been cloudy 2 and cool as the procession some five or six hours long marched on.

We are all very well, Twin Oaks looks very dry and burned up, about as Beinn Bhreagh did when we arrived the first of August.

With love to you and Mabel and your children.
